

Explore **branding** in a

DIFFERENT WAY

One of the most important things in real estate is branding yourself and with MLS-Touch you are now able to do just that!

The new **Brand and Share** feature allows you to build your own mobile app in a few seconds! It will brand the detailed listing reports that you send by email through MLS-Touch as well.

You will be able to view the properties that your clients have added to their own favorites and send them suggestions through your branded application.

**There is SO much more to learn!
Come join us explore these new features!**
